**Proprietary Magnet Inspection Aid for SPIN EZ® Oil Filters
No Longer Available**

The Tempest® SPIN EZ® spin-on oil filters' FAA approved design includes an optional magnetic inspection aid for maintenance personnel which is capable of attracting fine steel particles to assist with detecting ferrous material during post oil-change filter inspection.

Unfortunately, due to supply chain disruptions, we are currently unable to procure this proprietary magnet and therefore unable to continue offering this additional feature. All other components and filtration quality you trust from Tempest® SPIN EZ® spin-on oil filters remain unchanged.
